IMD BIOFENSE
Decoration and bacteria protection in a single process
Integrated bacterial defense

Thanks to the efficient IMD technology, KURZ has succeeded with IMD BIOFENSE in integrating antibacterial surface properties of plastic components easily and economically into one process. Manufactured with advantages of IMD technology, the transparent surface protection can be combined with a variety of outstanding designs. It is well suited for high-gloss surfaces as it is for special effects such as day/night designs, Shy Tech or backlighting.

Hygienic design freedom

With its antibacterial depot effect, IMD BIOFENSE is the sustainable and efficient solution for hygienic HMI surfaces and touch displays. In addition, the surface does not interfere with the function of antennas and capacitive sensor fields. A strong, invisible protection – also for autonomous driving and smart homes.
