

360° Lifecycle Thinking

Comprehensive sustainability as a competitive advantage

As a global player, we take our social responsibility very seriously and focus on sustainability in the further development of our solutions and processes. Benefit from our sustainability innovations and efforts for your competitive advantage.

Design for Recycling:

Our clean eco-designs makes your holistic design an eye-catcher.

Lifecycle Thinking:

Surface finishing succeeds more sustainably with KURZ, e.g. with 100% recyclable decorations – from the outset.

Compelling responsibly:

We support you – with safe decoration processes, optimized supply chains, and increasing use of renewables. See for yourself.

Metallization with indium:

Galvanization and plating are yesterdays technology. We offer THE environmentally friendly alternative. Ideal for 5G and radar applications.

Nature re-interpreted:

Back to nature is the future for you? Get to know our Spacewood designs for recycled surfaces today.
